THE JOURNAL OF EXPERIMENTAL EDUCATION

ANNUAL INDEX
Volume 65
Fall 1996–Summer 1997

AUTHORS

Butyniec-Thomas, Jean; and Woloshyn, Vera E. The Effects of Explicit-Strategy and Whole-Language Instruction on Students' Spelling Ability, Summer, 293–302.

Daniel, Larry G. Kerlinger's Research Myths: An Overview With Implications for Educational Researchers, Winter, 101–112.

Fan, Xitau; Chen, Michael; and Matsumoto, Audrey R. Gender Differences in Mathematics Achievement: Findings From the *National Educational Longitudinal Study of 1988*, Spring, 229–241.

Griffin, Bryan W.; and Griffin, Marlynn M. The Effects of Reciprocal Peer Tutoring on Graduate Students' Achievement, Test Anxiety, and Academic Self-Efficacy, Spring, 197–209.

Hancock, Thomas E.; Stock, William A; Kulhavy, Raymond W.; and Swindell, Linda K. Gender and Development Differences in the Academic Study Behaviors of Elementary School Children, Fall, 18–39

Harwell, Michael. An Investigation of the Raudenbush (1988) Test for Studying Variance Heterogeneity, Winter, 181–190.

Hsiung, Tung-Hsing; and Olejnik, Stephen. Type I Error Rates and Statistical Power for the James Second-Order Test and the Univariate *F* Test in Two-Way Fixed-Effects ANOVA Models Under Heteroscedasticity and/or Nonnormality, Fall, 57–71.

Karabenick, Stuart; and Collins-Eaglin, Jan. Relation of Perceived Instructional Goals and Incentives to College Students' Use of Learning Strategies, Summer, 331–341.

Keselman, Harvey J.; Cribbie, Robert; and Zumbo, Bruno D. Specialized Tests for Detecting Treatment Effects in the Two-Sample Problem, Summer, 355–366.

Kiewra, Kenneth A.; Mayer, Richard E.; DuBois, Nelson F.; Christensen, Maribeth; Kim, Sung-Il; and Risch, Nancy. Effects of Advance Organizers and Repeated Presentations on Students' Learning, Winter, 147–159.

Kromrey, Jeffrey D.; and Foster-Johnson, Lynn. Determining the Efficacy of Intervention: The Use of Effect Sizes for Data Analysis in Single-Subject Research, Fall, 73–93

Marso, Ronald N.; and Pigge Fred L. A Longitudinal Study of Persisting and Nonpersisting Teachers' Academic and Personal Characteristics, Spring, 243–254.

May, Kim; and Hittner, James B. Tests for Comparing Dependent Correlations Revisited: A Monte Carlo Study, Spring, 257–269.

McDougall, Dennis; and Granby, Cheryl. How Expectation of Questioning Method Affects Undergraduates' Preparation for Class, Fall, 43–54.

Miller, Arden T.; and Hom, Harry L., Jr. Conceptions of Ability and the Interpretation of Praise, Blame, and Material Rewards, Winter, 163–177.

Pajares, Frank; and Miller, M. David. Mathematics Self-Efficacy and Mathematical Problem-Solving: Implications of Using Different Forms of Assessment, Spring, 213–228.

Ponticell, Judith A.; and Olivarez, Arturo. Dissertation Quality and Kerlinger's *Methods Myth*, Winter, 113–122.

Ponticell, Judith A.; and Olivarez, Arturo. Dissertation Quality and Kerlinger's *Methods Myth*, Winter, 113–122.

Rhodes, Robert L.; Whitten, Janice D.; and Copeland, Ellis P. Early Intervention With At-Risk Hispanic Students: Effectiveness of the Piacceleration Program in Developing Piagetian Intellectual Processes, Summer, 318–328.

Rowell, R. Kevin. Kerlinger's Practicality Myth and the Quality of Research Instruction: An Overview of the Content of Educational Research Textbooks, Winter, 123–131.

Schraw, Gregory. The Effect of Generalized Metacognitive Knowledge on Test Performance and Confidence Judgments, Winter, 135–146.

Schneider, Pamela J.; and Penfield, Douglas A. Alexander and Govern's Approximation: Providing an Alternative to ANOVA Under Variance Heterogeneity, Spring, 271–286.

Shen, Jianping. Structure of the Theoretical Concept of Educational Goals: A Test of Factorial Validity, Summer, 342–352.

Skinner, Christopher H.; Robinson, Sheri L.; Johns, Gregg A.; Logan, Patricia; and Belfiore, Phillip J. Applying Herrnstein's Matching Law to Influence Students' Choice to Complete Difficult Academic Tasks, Fall, 5–17.

Sun, Anji; Valiga, Michael J.; and Gao, Xiaohong. Using Generalizability Theory to Assess the Reliability of Student Ratings of Academic Advising, Summer, 367–379.

Verdi, Michael P.; Johnson, Janet T.; Stock, William A.; Kulhavy, Raymond W.; and Whitman-Ahern, Polly. Organized Spatial Displays and Texts: Effects of Presentation Order and Display Type on Learning Outcomes, Summer, 303–317.

TITLES

Alexander and Govern's Approximation: Providing an Alternative to ANOVA Under Variance Heterogeneity. Pamela J. Schneider and Douglas A. Penfield, Spring, 271–286.

Applying Herrnstein's Matching Law to Influence Students' Choice to Complete Difficult Academic Tasks. Christopher H. Skinner, Sheri L. Robinson, Gregg A. Johns, Patricia Logan, and Phillip J. Belfiore, Fall, 5–17.

Conceptions of Ability and the Interpretation of Praise, Blame, and Material Rewards. Arden T. Miller and Harry L. Hom, Jr., Winter, 163–177.

Determining the Efficacy of Intervention: The Use of Effect Sizes for Data Analysis in Single-Subject Research. Jeffrey D. Kromrey and Lynn Foster-Johnson, Fall, 73–93.

Dissertation Quality and Kerlinger's *Methods Myth*. Judith A. Ponticell and Arturo Olivares, Winter, 113–122.

Early Intervention With At-Risk Hispanic Students: Effectiveness of the Piacceleration Program in Developing Piagetian Intellectual Processes. Robert L. Rhodes, Janice D. Whitten, and Ellis P. Copeland, Summer, 318–328.

The Effect of Generalized Metacognitive Knowledge on Test Performance and Confidence Judgments. Gregory Schraw, Winter, 135–146.

Effects of Advance Organizers and Repeated Presentations on Students' Learning. Kenneth A. Kiewra, Richard E. Mayer, Nelson F. DuBois, Maribeth Christensen, Sung-Il Kim, and Nancy Risch, Winter, 147–159.

The Effects of Explicit-Strategy and Whole-Language Instruction on Students' Spelling Ability. Jean Butyniec-Thomas and Vera E. Woloshyn, Summer, 293–302.

The Effects of Reciprocal Peer Tutoring on Graduate Students' Achievement, Test Anxiety, and Academic Self-Efficacy. Bryan W. Griffin and Marlynn M. Griffin, Spring, 197–209.

Gender and Development Differences in the Academic Study Behaviors of Elementary School Children. Thomas E. Hancock, William A. Stock, Raymond W. Kulhavy, and Linda K. Swindell, Fall, 18–39.

Gender Differences in Mathematics Achievement: Findings From the *National Educational Longitudinal Study of 1988*. Xitau Fan, Michael Chen, and Audrey R. Matsumoto, Spring, 229–242.

How Expectation of Questioning Method Affects Undergraduates' Preparation for Class. Dennis McDougall and Cheryl Granby, Fall, 43–54.

An Investigation of the Raudenbush (1988) Test for Studying Variance Heterogeneity. Michael Harwell, Winter, 181–190.

Kerlinger's Practicality Myth and the Quality of Research Instruction: An Overview of the Content of Educational Research Textbooks. R. Kevin Rowell, Winter, 123–131.

Kerlinger's Research Myths: An Overview With Implications for Educational Researchers. Larry G. Daniel, Winter, 101–112.

A Longitudinal Study of Persisting and Nonpersisting Teachers' Academic and Personal Characteristics. Ronald N. Marso and Fred L. Pigge, Spring, 243–254.

Mathematics Self-Efficacy and Mathematical Problem Solving: Implications of Using Different Forms of Assessment. Frank Pajares and M. David Miller, Spring, 213–228.

Organized Spatial Displays and Texts: Effects of Presentation Order and Display Type on Learning Outcomes. Michael P. Verdi, Janet T. Johnson, William A. Stock, Raymond W. Kulhavy, and Polly Whitman-Ahern, Summer, 303–317.

Relation of Perceived Instructional Goals and Incentives to College Students' Use of Learning Strategies. Stuart A. Karabenick and Jan Collins-Eaglin, Summer, 331–341.

Specialized Tests for Detecting Treatment Effects in the Two-Sample Problem. Harvey J. Keselman, Robert Cribbie, and Bruno D. Zumbo, Summer, 355–366.

Structure of the Theoretical Concept of Educational Goals: A Test of Factorial Validity. Jianping Shen, Summer, 342–352.

Tests for Comparing Dependent Correlations Revisited: A Monte Carlo Study. Kim May and James B. Hittner, Spring, 257–269.

Type I Error Rates and Statistical Power for the James Second-Order Test and the Univariate *F* Test in Two-Way Fixed-Effects ANOVA Models Under Heteroscedasticity and/or Nonnormality. Tung-Hsiung and Stephen Olejnik, Fall, 57–71.

Using Generalizability Theory to Assess the Reliability of Student Ratings of Academic Advising. Anji Sun, Michael J. Valiga, and Xiaohong Gao, Summer, 367–379.
